

Open Position

Technician/Research Associate: Antibody Oncology Research (100%)

Araris Biotech AG is a PSI and ETH spin-off company close to Zurich, Switzerland, developing high performance antibody-drug conjugates (ADCs) using our proprietary Araris Linker Technology. We are currently looking for a highly motivated Technicians/Research Associate to join our enthusiastic and dedicated team.

Responsibilities:

- Support planning and execution of drug discovery projects, including characterization of ADCs (biophysical properties, specific activity, biological assays etc.) in close collaboration with team members
- Support implementation of project-specific cell-based, functional and other biological assays and their optimization
- Plan, execute and report experimental work independently and in collaboration with team members
- Organizational duties such as management of reagents and consumables, management and maintenance of laboratory instruments, service contracts etc.
- Support the Araris Team to fulfill company milestones

Requirements:

- Biology-oriented technician/research associate degree or Master of Science in Cell/Protein Biology, Biochemistry, Pharmaceutical Sciences or similar
- Extensive hands-on experience with setup and execution of standard cell culture and cell-based assays
- Expertise in analytical assays (ELISA, FACS, etc.)
- Strong experience with biochemical and cell biology techniques
- Experience with protein expression, purification, formulation and characterization (FPLC/HPLC, SDS-PAGE, LC-MS) is a plus but not required
- Experience with antibody or ADC work is desired
- Excellent communication skills
- Feel comfortable with English (spoken/written) as main communication language
- Computational work (Word, Excel, PowerPoint, GraphPad Prism)
- Passionate about working in a high intensity-work start-up company
- Strong and fun team player

Do you feel ready for this challenge at Araris Biotech? We are looking forward to receiving your application!
