

Open Position

Senior Scientist/ADC specialist with strong background in drug and cancer-related research : Antibody Oncology Research (100%)

Araris Biotech AG is a PSI and ETH spin-off company close to Zurich, Switzerland, developing high performance antibody-drug conjugates (ADCs) using our proprietary Araris Linker Technology. We are currently looking for a highly motivated Senior Scientist to join our enthusiastic and dedicated team.

Responsibilities:

- Develop, execute and manage drug discovery projects for our internal research programs for cancer indications
- Design and support setup of appropriate in vitro and in vivo experiments for proof-of-concept studies for ADC candidates
- Supervise and manage interactions with CROs to timely meet company milestones
- Track, monitor and report project progress and ensure high data quality
- Support the Araris Team to fulfill company milestones

Requirements:

- PhD degree in Cancer Biology, Molecular Biology, Protein Engineering, Pharmaceutical Sciences or in a related technical field
- Strong background in cancer biology and cancer therapeutics is a must, experience with ADC technology is a plus
- Hands on laboratory experience in cell biology (cell culture, cell assays etc.) and general molecular assays is required
- Excellent practical and analytical experience with antibody/protein-based therapeutic approaches (characterization in-vitro, in-vivo)
- Ideally, working experience in industrial setting
- Experience with project and team lead
- Passionate about working in a high intensity-work start-up company that is rapidly evolving
- Excellent communication, presentation and organizational skills
- Strong and fun team player

Do you feel ready for this challenge at Araris Biotech? We are looking forward to receiving your application!
